

Most-restrictive decision composition

An approval satisfies an approval requirement; it never cancels denial.

Priority	Decision	Operational meaning
1	DENY	Withhold the operation.
2	REQUIRE_APPROVAL	Obtain one matching exact human authorization.
3	SANDBOX	Execute only within the required validated sandbox.
4	ALLOW_WITH_CONSTRAINTS	Enforce all compatible obligations.
5	ALLOW	Proceed only after all remaining boundary checks.
