

Truthful coverage is scoped evidence

A functional gateway is insufficient to establish exclusive resource access.

State	Meaning	Protection claim
ENFORCED	Authenticated, governed, audited, fail-safe and exclusively mediated	Exact declared path only; current trusted evidence required.
DEGRADED	A required guarantee or bypass control is incomplete	Block protected mutations.
OBSERVE_ONLY	Recorded traffic cannot reliably be blocked	No enforcement claim.
UNPROTECTED	No verified enforcing path exists	Current deployment state; protected forwarding disabled.
